

### Mobile Testing Units

These units, run by national coronavirus testing programme staff, are located in community locations across the city. They may change location weekly.

### Who can be tested?

- Anyone who is symptomatic such as a high temperature, a new cough, or a change in sense of taste or smell, or is concerned they may have the virus.

### When to apply for a test

- You need to get the test done in the first five days of having [symptoms](#).
- You and anyone you live with must [stay at home](#) until you get your result.
- Anyone in your [support bubble](#) must also [stay at home](#) until you get your result.

### How to book a test

- Self-referral - book a test [online](#) or call 119 (translation services available).
- Employer-referral - [portalservicedesk@dhsc.gov.uk](mailto:portalservicedesk@dhsc.gov.uk).
- Care homes – [info@genqa.org](mailto:info@genqa.org).
- Once you've booked a test, you'll receive a confirmation message with details of your appointment.

### Test results

- You'll receive results within 48 hours of a swab being taken, or within 72 hours for a home test.
- Your results will be delivered by Text or Email.
- There are three types of results – negative; positive; unclear, void, borderline or inconclusive.
- If you don't get your result within the timescales indicated above, you should call 119 (7am to 11pm).

### Negative test result

You don't have to [stay at home](#) if your test is negative, as long as:

- Everyone who you live with who has [symptoms](#) tests negative.
- Everyone in your [support bubble](#) who has [symptoms](#) tests negative.
- You're not told to [stay at home](#) by [NHS Test & Trace](#).
- You feel well – if you feel unwell, stay at home until you feel better.

### Positive test result

- If you've had [symptoms](#), you should [stay at home](#) for at least 10 days from when your [symptoms](#) started.

- If you didn't have [symptoms](#), you should [stay at home](#) for 10 days from when you had the test.
- Anyone you live with, or who's in your [support bubble](#), should [stay at home](#) for 14 days from when you start.

**Unclear, void, borderline, inconclusive test**

- You should get another test as soon as possible.
- If you've had [symptoms](#), you should [stay at home](#) and book another test within 5 days.
- Outside this time, you should [stay at home](#) for 10 days from the outset of [symptoms](#). Anyone you live with, or who's in your [support bubble](#), should [stay at home](#) for 14 days.
- If you don't have [symptoms](#), there's no need for yourself, or anyone you live with or who's in your [support bubble](#) to [stay at home](#).
